Installation Guide

Double-click *a3-configurator-installer-1.0.0.msi* to run the setup wizard, follow the prompts and complete the installation.

(Note: If the following prompt box appears during installation, it means that the Microsoft .NET Framework 4 is not installed on your PC, please install it first by running *dotNetFx40_Full_x86_x64.exe*. This usually occurs when installing the A3 Configurator on an earlier version of Windows).

🙀 HobbyEagle 🗚 Configurator	
This setup requires the .NET Framework versior and run this setup again. The .NET Framework you like to do this now?
